SUMMARY

AI & ML engineering student with a foundational knowledge of Python, Machine Learning, and Data Analysis, along with hands-on experience working with embedded systems and IoT technologies. Interested in developing intelligent, data-driven solutions by combining AI/ML techniques with real-world applications. Eager to expand technical skills and contribute to innovative engineering projects.

EDUCATION

B.Tech, Computer Science and Engineering (Artificial Intelligence and Machine Learning)
MIT Academy of Engineering, Alandi | Expected graduation: 2028 | CGPA: 7.87

SOFT SKILLS

Problem-Solving, Analytical Thinking, Teamwork, Communication, Adaptability, Quick Learning

TECHNICAL SKILLS

Language: Python, C++
AI & Machine Learning: Machine Learning, Deep Learning Fundamentals
Embedded Systems & IoT: ESP32, Arduino, Sensor Interfacing
Tools: VS Code, Git, Jupiter notebook
Currently Learning: NLP, Generative Ai

PROJECTS

AI-Based Legal Advisory System – MyLegalAI (Minor Project)
Python, TensorFlow/Keras, NLP, Sentence Transformers, Deep Learning

- Developed an AI-based legal advisory website providing relevant legal provisions, recommended actions, and step-by-step guidance.
- Implemented a hybrid BiLSTM–GRU model with Transformer-based semantic search using a structured legal dataset of 7,600 records.
- Integrated confidence-based fallback matching and lawyer-referral indicators for uncertain or complex legal queries.

Smart Fire Detection and Automatic Fire Suppression System
ESP32, Embedded C/C++, Flame Sensors, MQ-2, DHT11, Relay Module

- Developing an automated fire detection and suppression system using flame, smoke, and temperature sensors, with ESP32-based control of a relay-operated water pump.
- Implementing real-time alerts using a buzzer, LEDs, and an LCD to indicate normal conditions, smoke warnings, and fire emergencies.

INTERNSHIP

Cisco Networking Academy Summer Internship

- Completed courses in Data Analytics Essentials, Introduction to Modern AI and Find Insights with AI.
- Worked in a team on a small project applying AI to network troubleshooting with human review of results.

CERTIFICATIONS

- Data Analytics Essentials — Cisco Networking Academy(NetAcad)
- Python – Cisco Networking Academy (NetAcad)
- Dreams Unlocked – Building an AI-Ready India — Edunet Foundation / HP
- Foundations of Quantum Computing — IBM Quantum
